

COLD CHAMBER PLUNGER RINGS

Plunger rings made of high Chromium content steel for Aluminium alloys pressure die-casting. The ring naturally fits the internal surface of the shot-sleeve thanks to the elasticity and pressure of melted metal that soaks in and makes hard into the cavity between plunger and plunger ring.

MANUFACTURING ACCORDING TO CUSTOMER'S INQUIRY

V.B. Meccanica indifferently produces standard or customized plunger rings according to customer's needs.

The technical data, tables, drawings and standard references have been approved by the technical department of V.B. Meccanica, which is responsible for their updating (Rev.0 October 2011)
